Declaration on biodegradability

Product: 0799385 SMB Fahrena

We hereby declare that the above-mentioned fragrance product is manufactured by Bell Flavors & Fragrances GmbH. The product contains ingredients that breakdown into the following amount of biodegradable and e.g. non-biodegradable ingredients indicated as % (weight/weight).

Assessment	% (w/w)
Readily biodegradable	> 31
Biodegradable	not contained
Inherently or partly biodegradable	< 31
Poorly or non-biodegradable	< 8
No data available	< 1

Approach for assessing the biodegradability of ingredients of perfume oils:

For the final assessment of biodegradability of a product existing data from MSDSs of our suppliers, publicly available ECHA* REACH dossiers and/or from the RIFM** database were searched and collected. Bell Flavors & Fragrances is an active member of RIFM and has therefore access to such information.

The available information and data, if available at all, are based on experimental data by performing biodegradation tests of the so-called OECD series (301A-F), OECD 302 or OECD 310. The results of such tests allow for the assessment of the biodegradability into the respective sub-categories (readily, inherent, etc.).

The assessment reflected here corresponds to our current knowledge. In the case of more recent findings, the assessments will be revised accordingly.

*ECHA = European Chemicals Agency; **RIFM = Research Institute for Fragrance Materials

This document has been created electronically and is valid without signature. All disclosures shall be valid until publication of the change/amendment. The information provided in this document is to the best of our current knowledge and has been compiled with the utmost reasonable care. However, this should not be construed to be a warranty claim. Improper transport and/or improper storage may result in quality changes beyond our control. Please be advised that the information contained herein does not exempt you from your obligation to exercise due diligence with respect to quality assurance, suitability testing and compliance with all applicable laws and regulations. Although we assume that the products delivered by our company comply with the legal requirements in the respective destination countries, we cannot guarantee their legality and therefore recommend that our customers confer with local authorities prior to use. Regulations to which reference is made refer to the latest current version.
